Diabetes Self-management Education and Support (DSME/S) If patients indicate a problem, ask how you can help, keeping in mind that you are not expected to solve this problem for the patient. Although this may seem like a burden given the time-constraints of a busy appointment, it may give you the insight you need to be helpful to those patients with whom you feel frustrated when you cannot help.

DSME/S and DSME/S-S | Endocrine Society

DSME/S-S is a structured educational program that is designed to be delivered in a group setting and is focused on teaching patients about self-management skills. It is recommended for all patients with diabetes.

DSME/S-S | Endocrine Society

DSME/S-S (Diabetes Self-management Education and Support) is a structured educational program that is designed to be delivered in a group setting and is focused on teaching patients about self-management skills. It is recommended for all patients with diabetes.

DSME/S-S | Endocrine Society

DSME/S-S (Diabetes Self-management Education and Support) is a structured educational program that is designed to be delivered in a group setting and is focused on teaching patients about self-management skills. It is recommended for all patients with diabetes.

DSME/S-S | Endocrine Society

DSME/S-S (Diabetes Self-management Education and Support) is a structured educational program that is designed to be delivered in a group setting and is focused on teaching patients about self-management skills. It is recommended for all patients with diabetes.
